

## June 2011

Strategic tourism marketing and policy decisions depend on accurate, consistent tracking of business indicators such as lodging statistics, attraction and welcome center visitation, transportation statistics and more. The intent of the North Carolina Travel Tracker is to provide up-to-date and relevant tourism indicators for both the state and individual regions within the state. With data from the Travel Tracker, program areas and industry partners can strategically plan, implement and evaluate processes and programs.

The following report analyzes a variety of tourism indicators by 1) State, 2) the three geographic marketing regions (coastal, piedmont and mountain), and for some indicators 3) the seven economic development regions. As well as providing a review of the current state of business, the report provides a year-to-date analysis and comparisons to previous years where applicable.

With regards to the lodging data found in this report; while virtually every chain in the United States provides Smith Travel Research (STR) with data on almost all of their properties, there are still some hotels that don't submit data. However, every year STR examines listings and directories for information on hotels that don't provide data. STR calls each hotel in the database every year to obtain "published" rates for multiple categories. Based on this information all hotels are grouped - those that report data and those that don't - into groupings based off of price level and geographic proximity. They then estimate the non-respondents based on nearby hotels with similar price levels.

Following is a guide to charts and graphs for this report:

### **Section 1 - Statewide Tourism Indicator Analysis for June 2011**

- Chart 1 – Hotel/Motel Occupancy in North Carolina June 2006 – 2011
- Chart 2 – Hotel/Motel Average Daily Room Rate in North Carolina June 2006 – 2011
- Chart 3 – Hotel/Motel Revenue per Available Room in North Carolina June 2006 – 2011
- Chart 4 – Hotel/Motel Room Demand in North Carolina June 2006 – 2011
- Chart 5 – North Carolina Lodging Statistics Monthly Percent Change 2008 – 2011
- Chart 6 – Statewide Visitation to Attractions June 2006 – 2011
- Chart 7 – Statewide Visitation to Attractions Monthly History 2006 – 2011
- Chart 8 – State Welcome Center and Local Visitor Center Attendance June 2006 – 2011
- Chart 9 – Statewide National and State Park Visitation June 2006 – 2011
- Chart 10 – Statewide Visitation to State Parks Monthly History 2006 – 2011
- Chart 11 – Statewide Visitation to National Parks Monthly History 2006 – 2011
- Chart 12 – Statewide Airport Arrivals and Departures June 2006 – 2011
- Chart 13 – Lower Atlantic Average Monthly Retail Gas Prices for Unleaded June 2006 – 2011
- Chart 14 – North Carolina Average Temperature and Precipitation June 2008 – 2011

### **Section 2 – Geographic Marketing Region Tourism Indicator Analysis for June 2011**

- Chart 15 – Hotel/Motel Statistics by Geographic Region June 2011
- Chart 16 – Hotel/Motel Room Demand by Geographic Region June 2011
- Chart 17 – Visitation to Attractions and Parks by Geographic Region – June 2011
- Chart 18 – State Welcome Center & Local Visitor Center Attendance by Geographic Region – June 2011
- Chart 19 – Airport Arrivals and Departures by Geographic Region – June 2011

### **Section 3 – Economic Development Region Tourism Indicator Analysis for June 2011**

- Chart 20 – Hotel/Motel Statistics by Economic Development Region June 2011
- Chart 21 – Hotel/Motel Room Demand by Economic Development Region June 2011

### **Section 4 – National Travel Price Index**

- Chart 22 - National Travel Price Index June 2006 – June 2011

## Section 1: Statewide Tourism Indicator Analysis for June 2011

Chart 1 – Hotel/Motel Occupancy in North Carolina - June 2006 – 2011

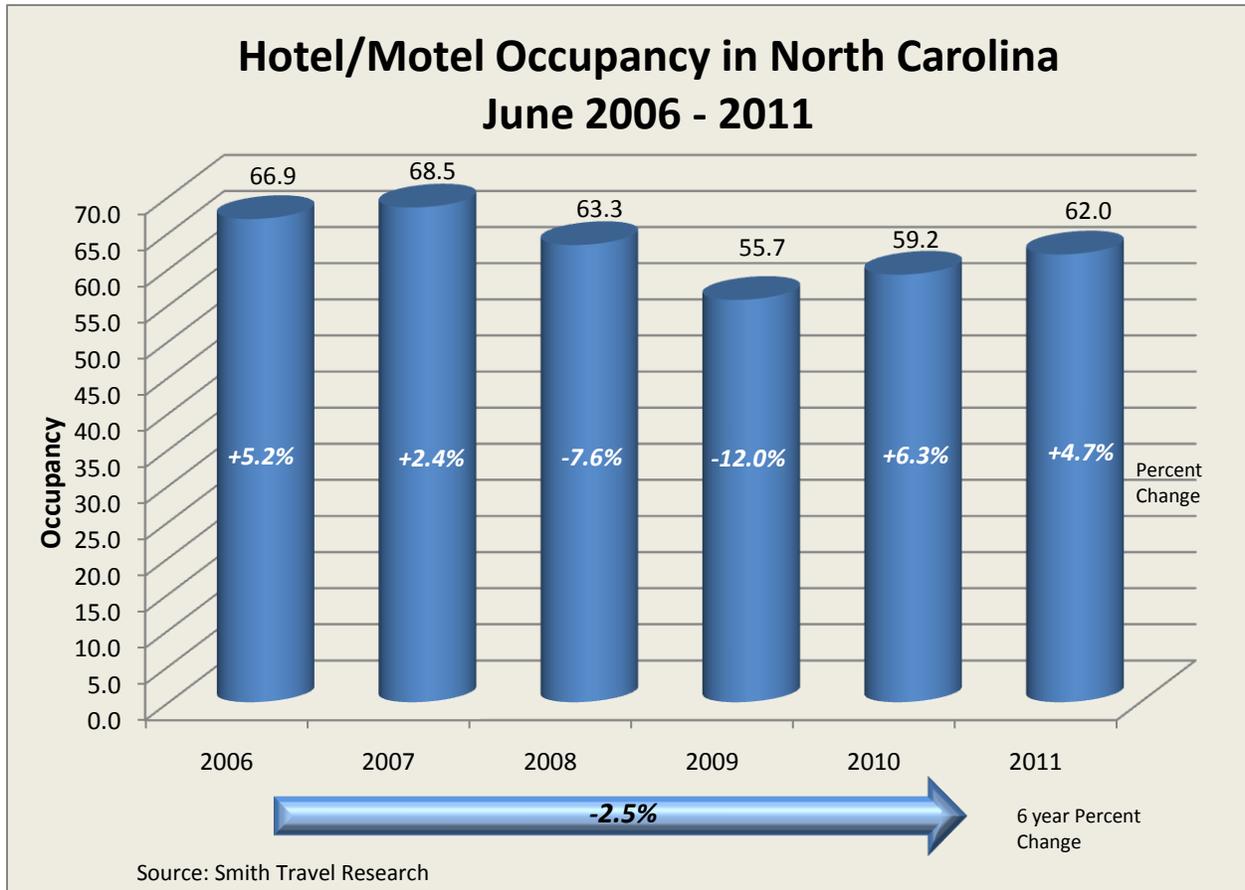

Chart 1 provides a comparison over a six year period to show the trend of occupancy in the state for the month of June. Occupancy for June 2011 was up nearly five percent from June 2010. *Occupancy at the national level increased by nearly five (+4.2%) percent in June 2011 from the previous year.*

Chart 2 – Hotel/Motel Average Daily Room Rate in North Carolina - June 2006 – 2011

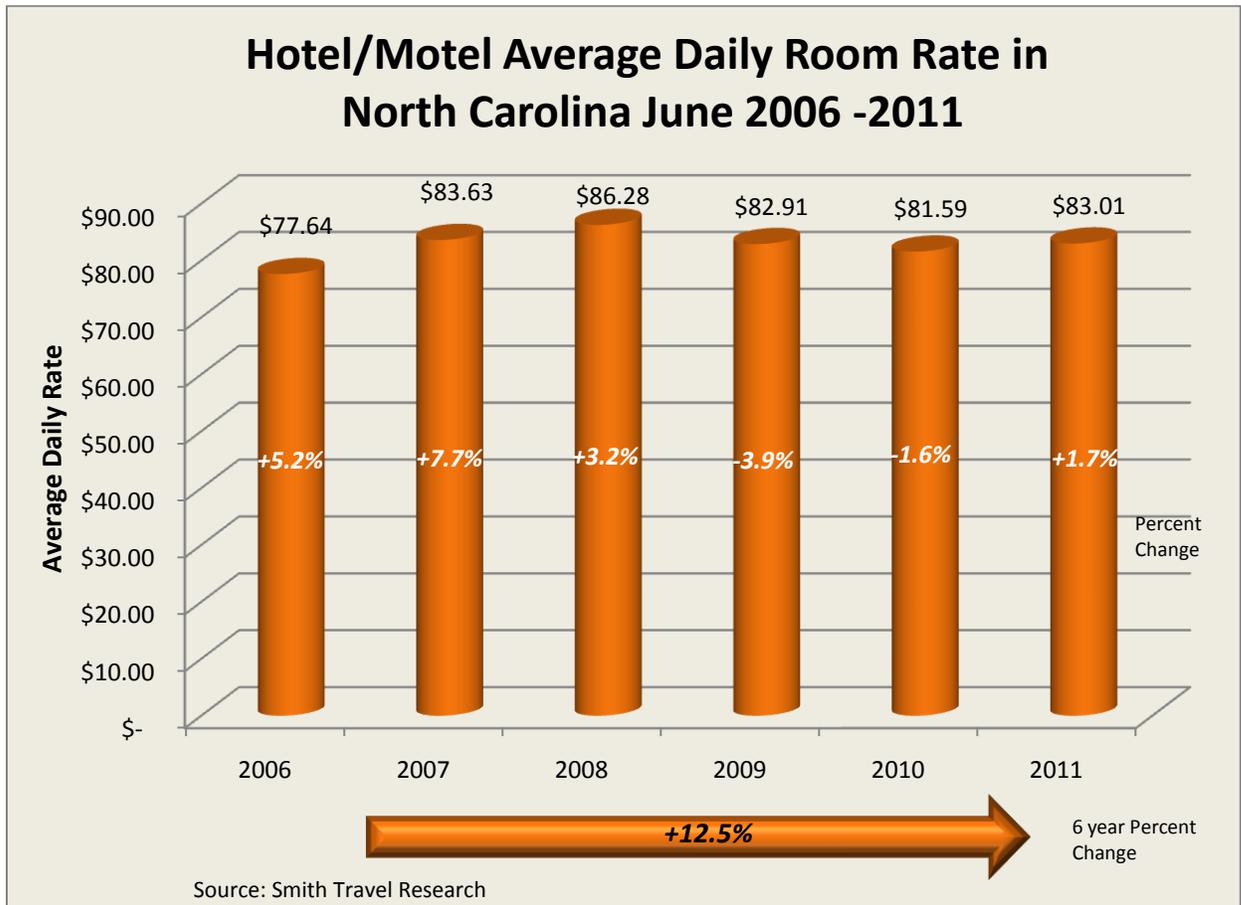

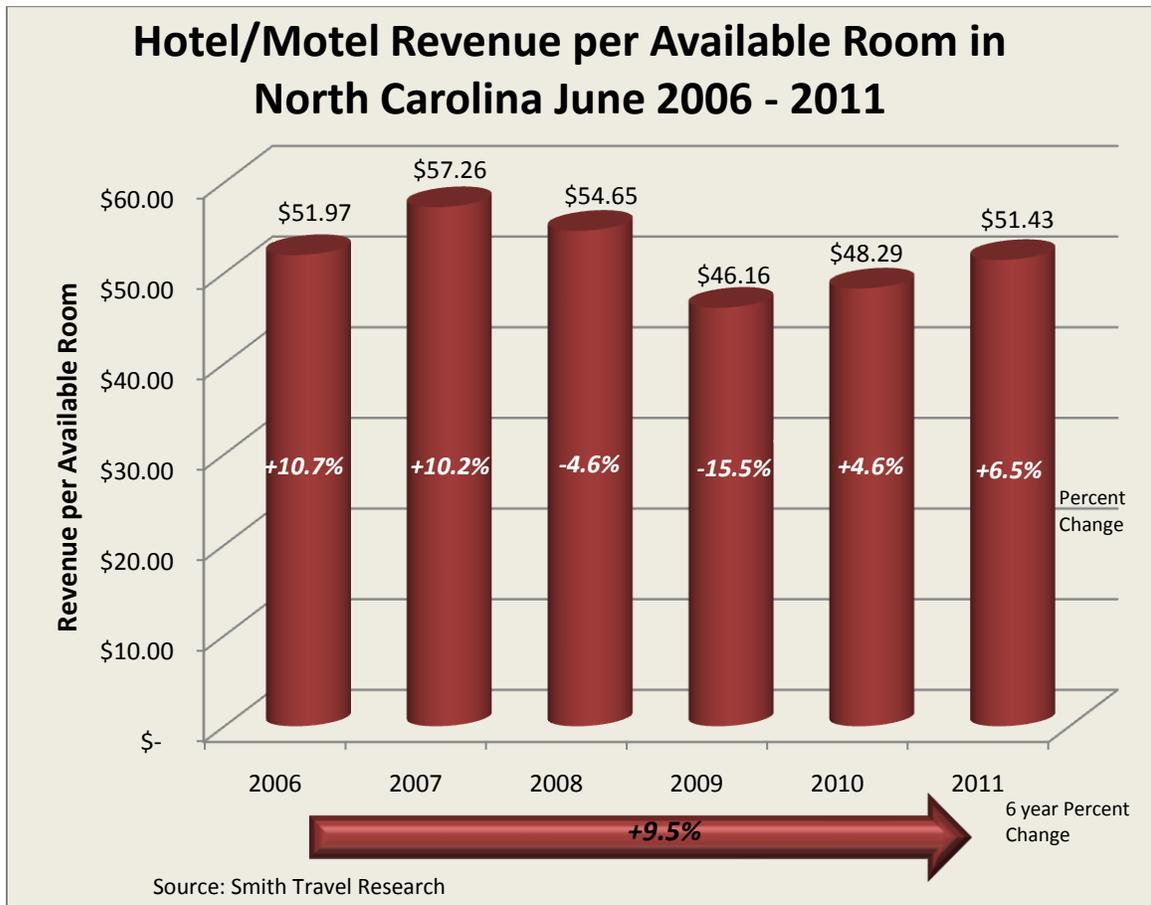

Chart 2 provides a comparison over a six year period to show the trend of average daily room rate (ADR) in the state for the month of June. After peaking in June 2008, ADR decreased over five percent in the subsequent two years, and gained nearly two percent back in June 2011. ADR at the national level was up 3.5% in June 2011 from the previous June.

Chart 3 – Hotel/Motel Revenue per Available Room in North Carolina - June 2006 – 2011

In Chart 3 an analysis of Revenue per Available Room (RevPAR) is provided. RevPAR is an industry term that describes the revenue that a hotel earns on the basis of just the rooms available for a given night. In other words, rooms not available either due to renovation or other reasons are not included in this equation. Mathematically, RevPAR can be determined dividing total room revenue by rooms available (occupancy times average room rate will closely approximate RevPAR).

As with previous charts, Chart 3 shows a comparison over a six year period to show the trend of RevPAR in the state for the month of June. RevPAR was up nearly seven percent (+6.5%) in June 2011, continuing the positive growth that began in the spring of 2010. *RevPAR at the national level was up 7.8% in June 2011 from the previous June.*

Chart 4 – Hotel/Motel Room Demand in North Carolina – June 2006 – 2011

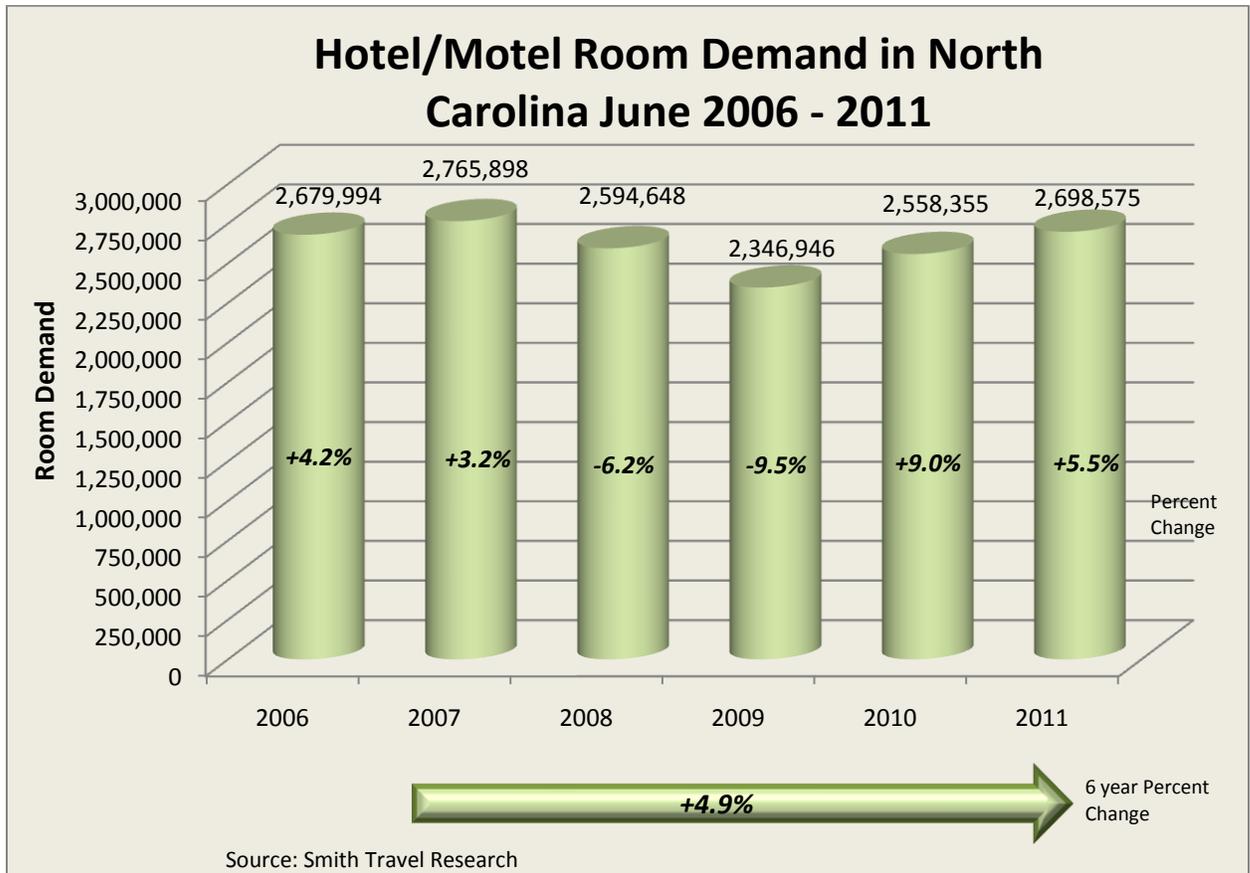

Chart 4 depicts hotel/motel demand for the month of June 2011 with comparisons to the previous five years. Demand is the number of rooms sold excluding complimentary rooms. Room demand for June was up over five percent from June 2010. *Room demand at the national level saw an increase of 4.9% change in June 2011 from the previous June.*

Chart 5 – North Carolina Lodging Statistics Monthly Percent Change 2008 – 2011

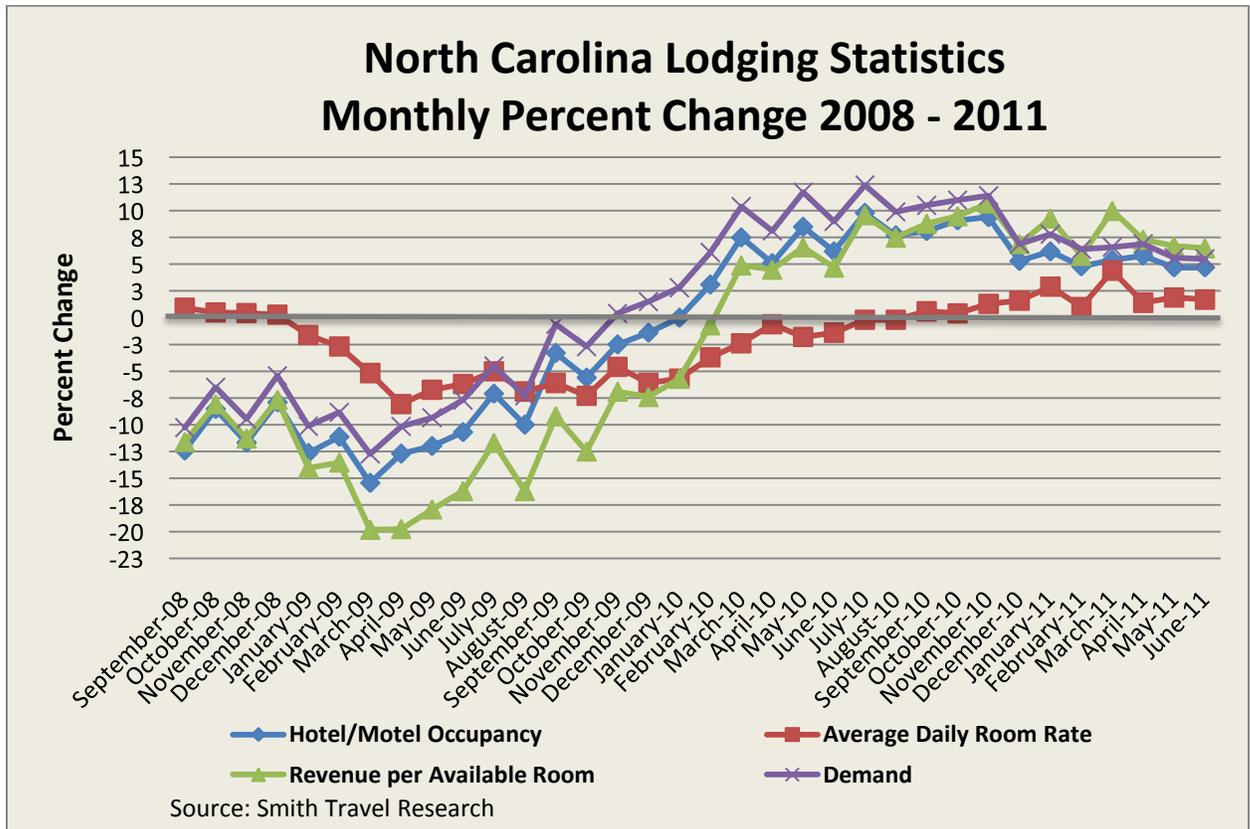

Chart 5 provides a monthly percent change for the four major lodging indicators. The chart allows for a 30 month trend-line analysis that clearly depicts that the major indicators have shown a steady positive change since early 2010, and are continuing into 2011. ADR, the last indicator to begin to rebound, remains in a growth phase with a 1.7% increase from last June.

Chart 6 – Statewide Visitation to Attractions - June 2006 – 2011

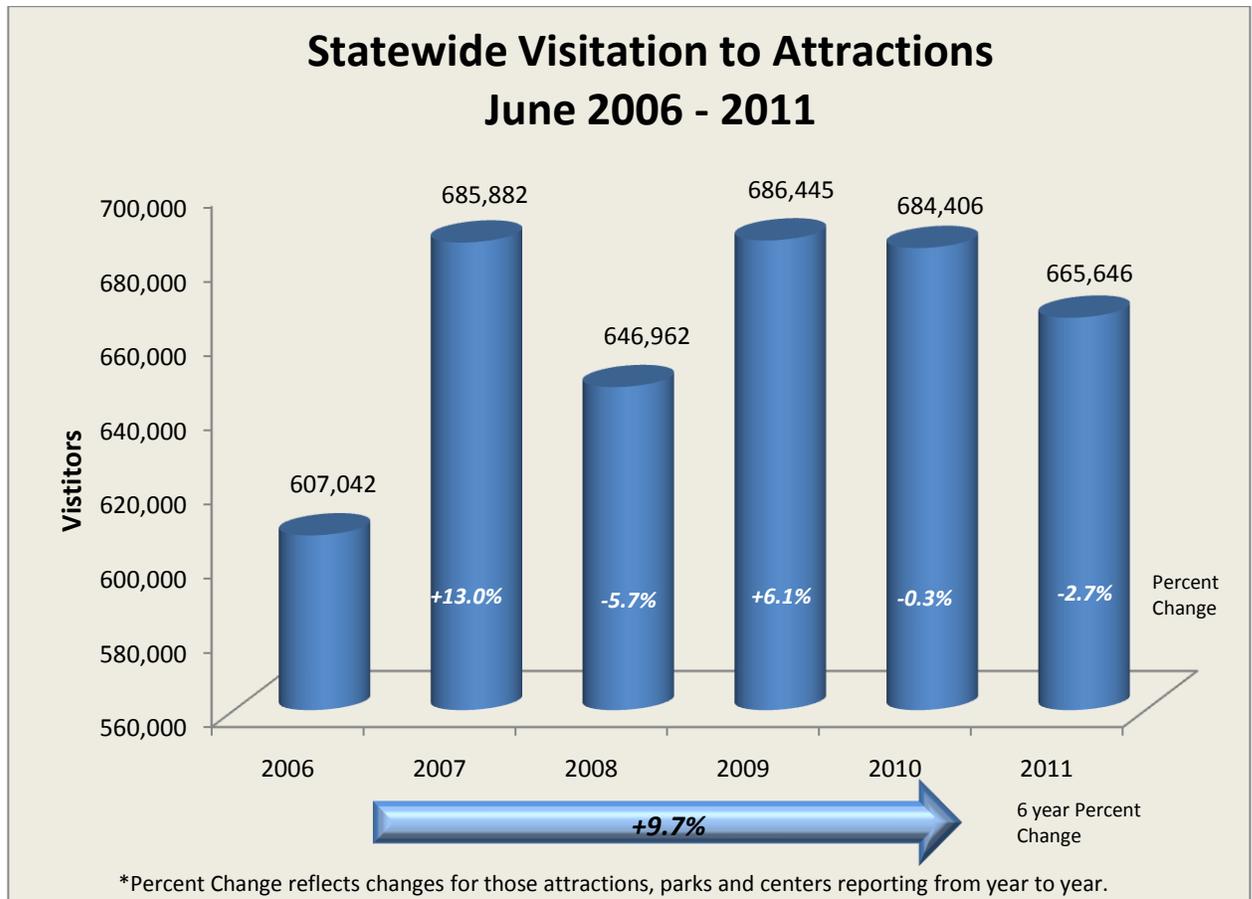

Chart 6 provides a status of the attractions industry in North Carolina for the month of June for the last six years. The numbers represent only a sample of North Carolina attractions that provide their attendance data, and are not intended to be considered a complete list of attractions. However, the wide variation of type and location of the participating attractions allow for a valid aggregate trend analysis on a monthly basis, particularly when tracking percent change. Missing values for attractions who regularly report have been estimated until visitation can be verified. These estimates are not included in percent change calculations from June 2010 to June 2011.

June showed a decrease for NC attraction attendance (-2.7%), but still a positive increase from 2006 (+9.7%).

Chart 7 – Statewide Visitation to Attractions Monthly History 2006 – 2011

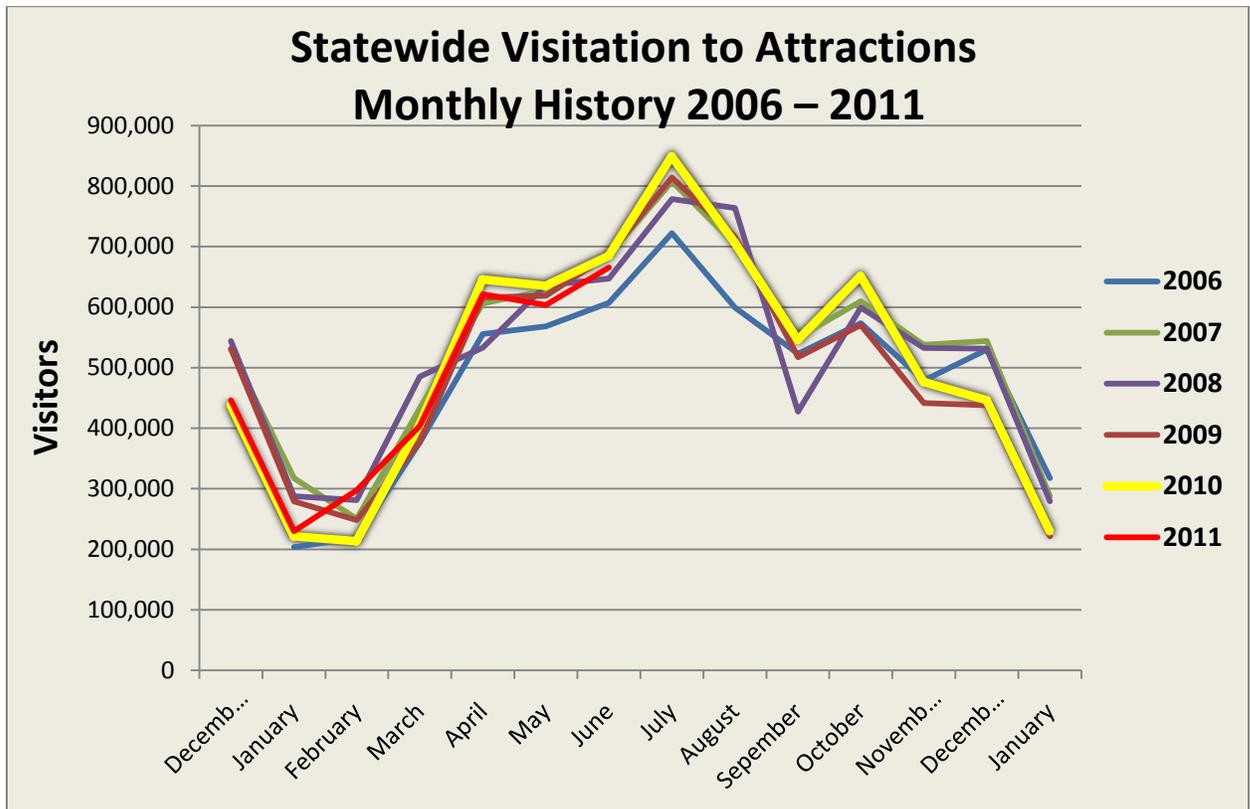

Chart 7 shows a monthly trend of attraction visitation for each of the last six years. This chart allows for a view of the ebb and flow of monthly attraction attendance, while also providing a look at how attendance compares to the same month of the previous years. Not surprisingly, the winter months see lower visitation numbers at statewide attractions. However, it is helpful to view how visitation is allocated by month for strategic planning purposes.

Again, the numbers represent only a sample of North Carolina attractions that provide their attendance data, and are not intended to be considered a complete list of attractions. However, the wide variation of type and location of the participating attractions allow for a valid aggregate trend analysis on a monthly basis.

Chart 8 – State Welcome Center and Local Visitor Center Attendance - June 2006 – 2011

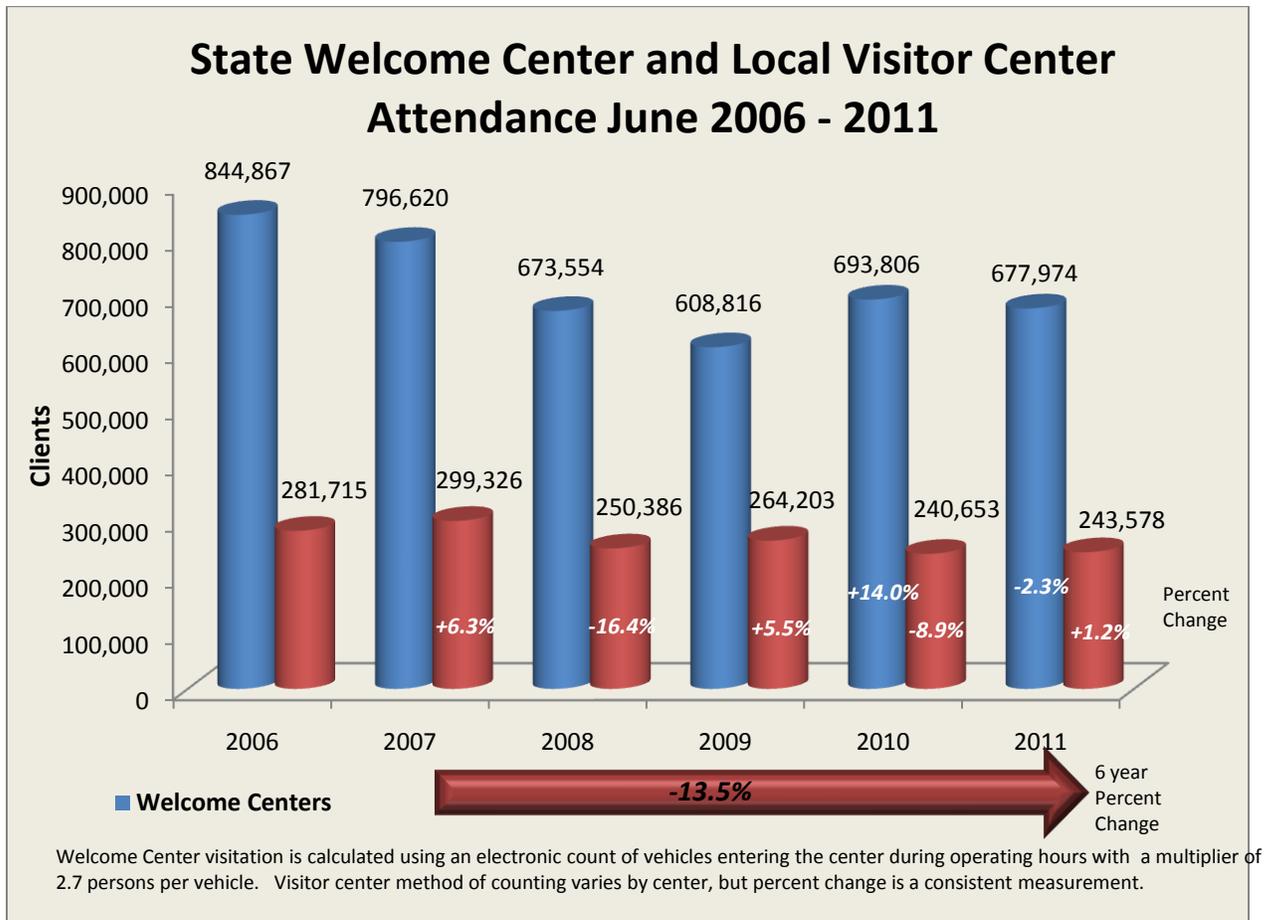

Chart 8 provides June visitation statistics for State Welcome Centers, as well as Local Visitor Centers throughout North Carolina. It should be noted that while there is a percent change indicated for welcome centers for 2007-2008 and 2008-2009, 2008 was the first year a percent change could accurately be provided. The NCDOT spent several years changing the counting mechanism at the state welcome centers making comparisons between years inaccurate from the time the DOT began installation until December 2008. Therefore, previous years' percent changes are not included in this particular chart.

June numbers were down slightly for welcome centers, but up slightly for visitor centers,.

Chart 9 – Statewide National and State Park Visitation - June 2006 – 2011

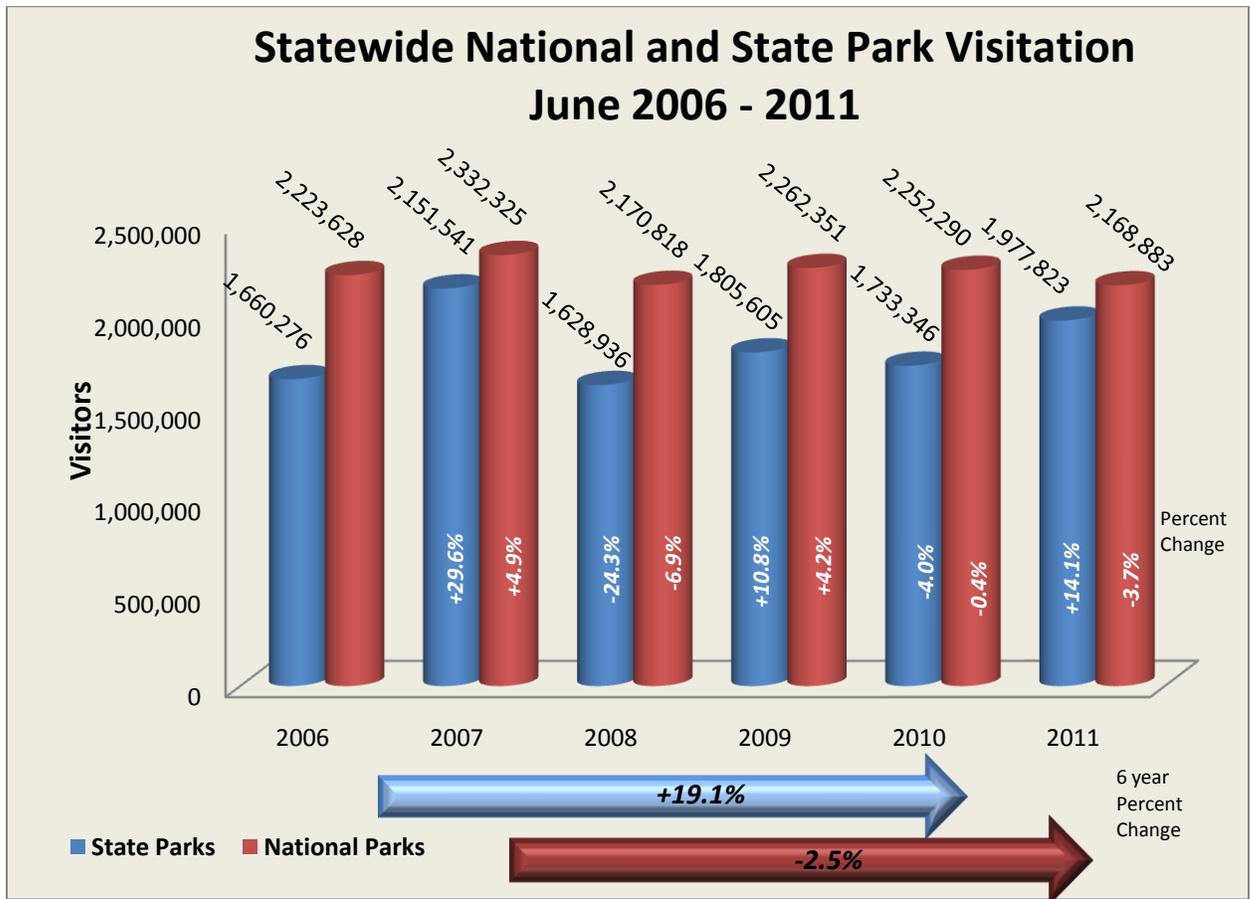

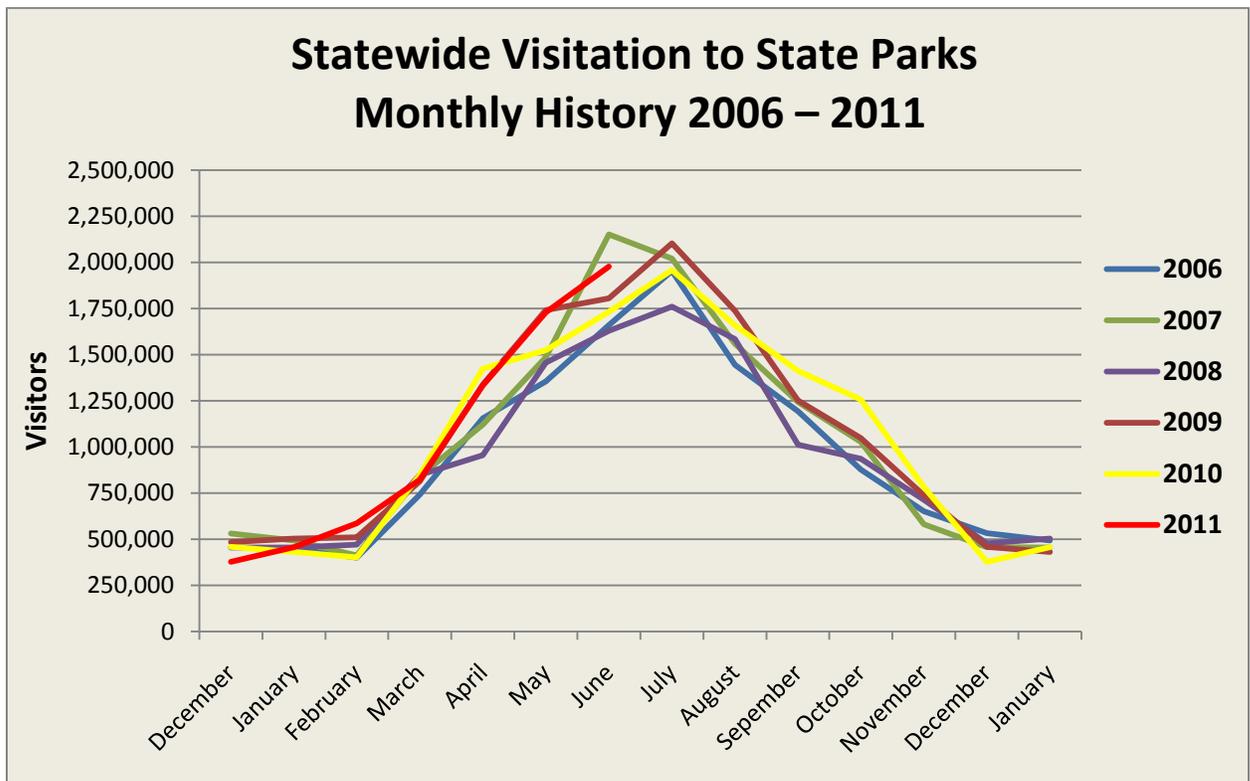

Chart 9 depicts visitation to state and national parks in North Carolina for the last six years months of June. While national park attendance had a decrease of about three percent in visitation in June, state park attendance in June had an increase of over fourteen percent from 2010.

**Chart 10 – Statewide Visitation to State Parks Monthly History 2006 – 2011**

Similar to Chart 7, Charts 10 and 11 provide a monthly trend of state and national park visitation for each of the last six years. These charts help monitor the flow of monthly attraction attendance, while also providing a look at how attendance compares to the same month of the previous years. It is important to note that there are many extraneous variables that can affect visitation at attractions, and particularly at outdoor attractions. Weather, temperature and holidays are variables that should be noted when viewing unusual highs or lows in attendance.

**Chart 11 – Statewide Visitation to National Parks Monthly History 2006 – 2011**

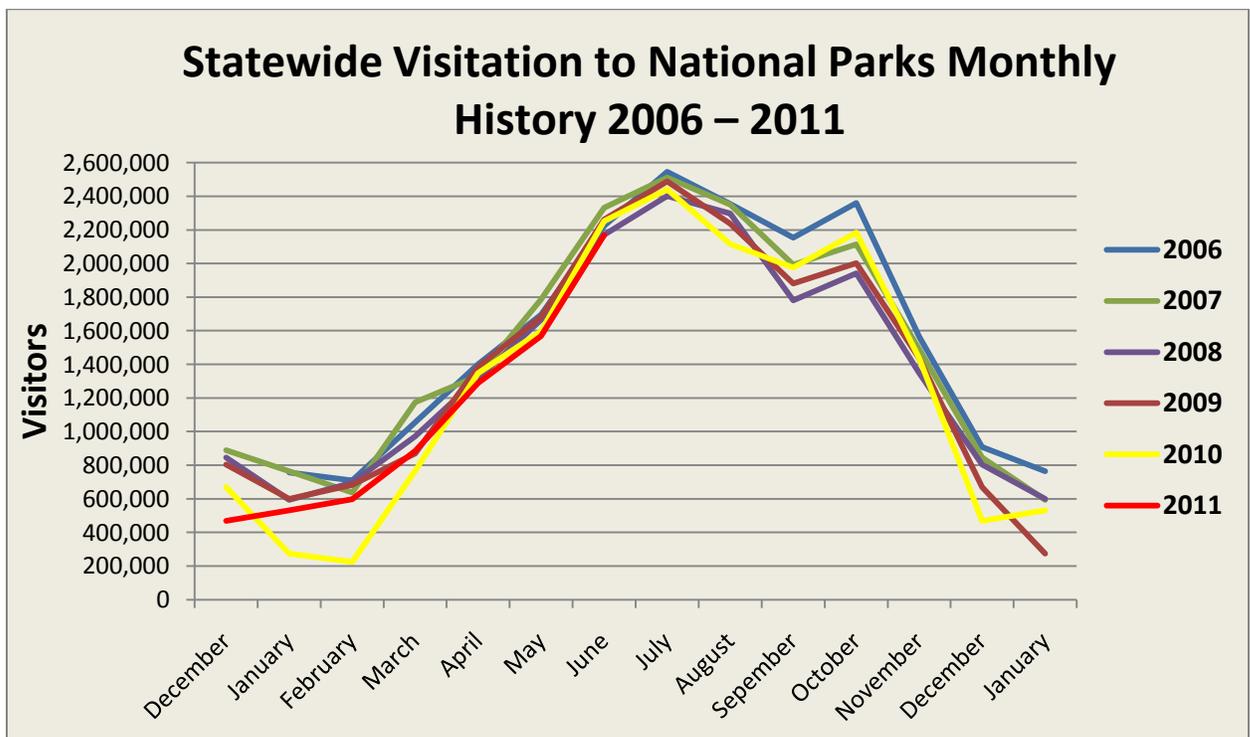

Chart 12 – Statewide Airport Arrivals and Departures - June 2006 – 2011

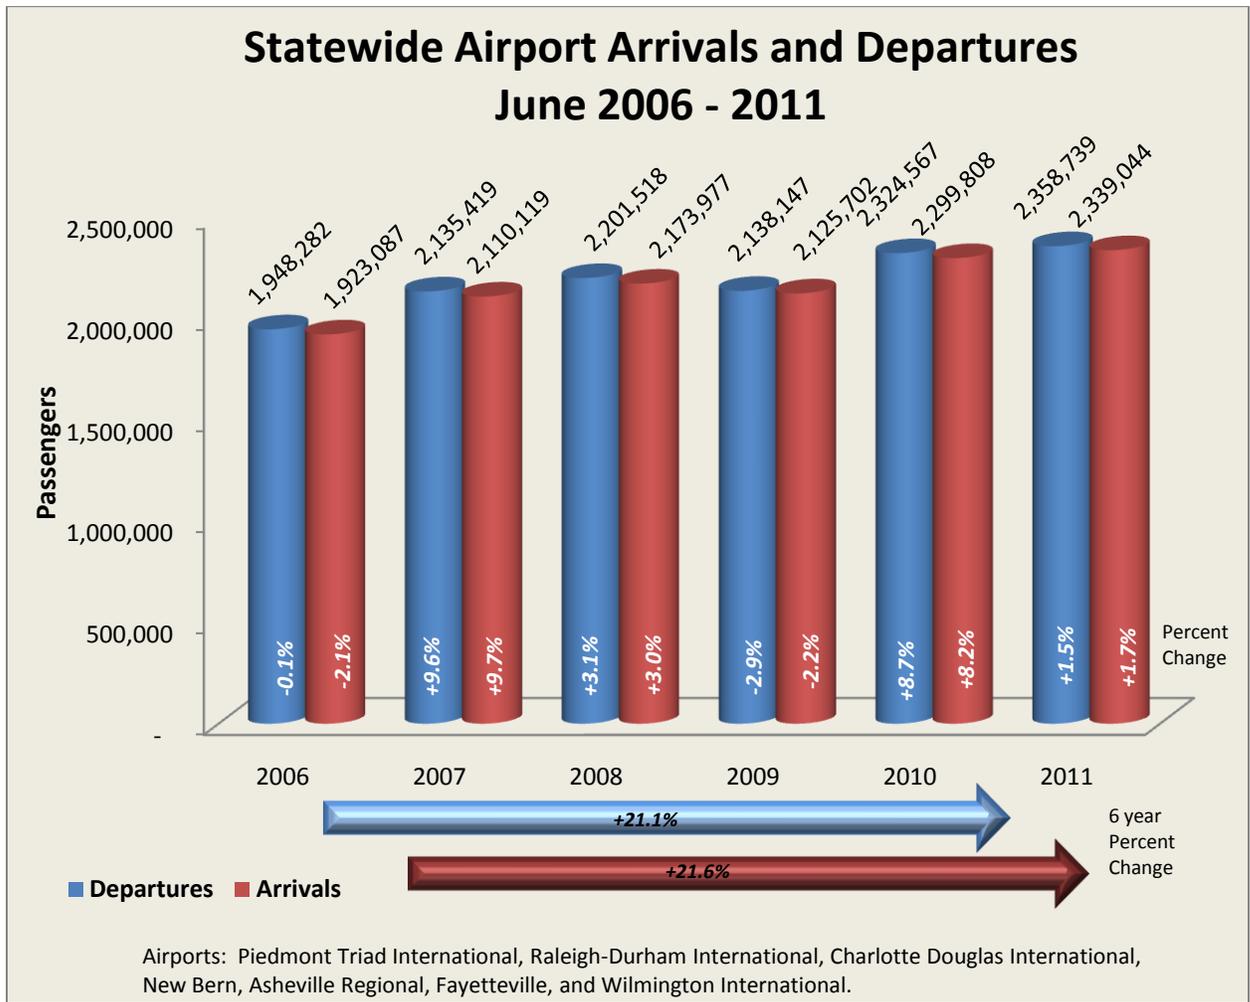

Chart 12 shows June airport arrivals and departures for each of the previous six years. The arrivals and departures grew just over one percent from last June, though there has been a substantial six-year increase in both for the month of June.

Chart 13 – Lower Atlantic Average Monthly Retail Gas Prices for Unleaded – June 2006 – 2011

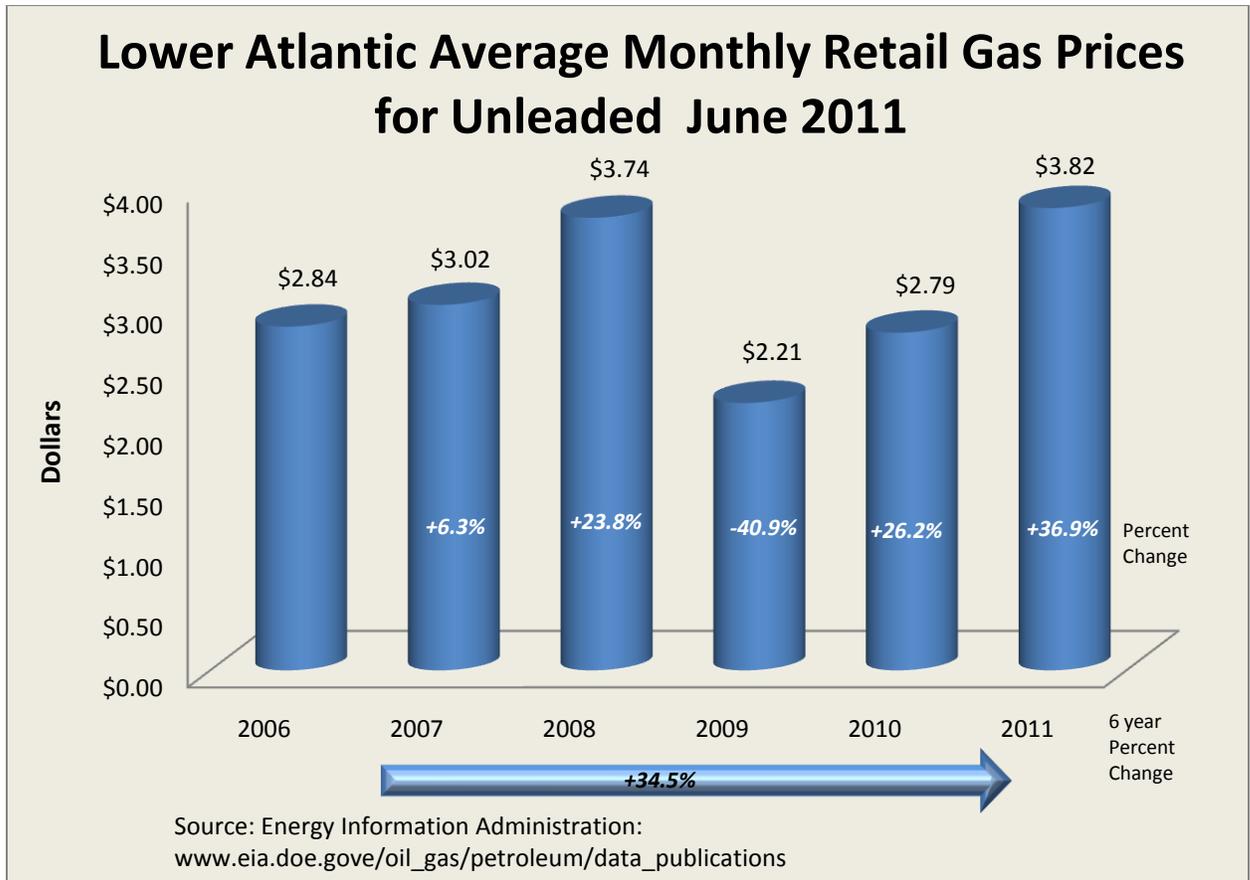

Chart 13 provides the average price per gallon of unleaded gasoline for June 2011 and the same month from the five previous years. The data provided above, when compared with other indicators such as attraction attendance and visitor spending data, can be very helpful in the analysis of general travel trends. Fuel prices in June 2011 surpassed 2008 levels, and were up nearly forty percent from last June.

Chart 14 – North Carolina Average Temperature and Precipitation – June 2010 – 2011

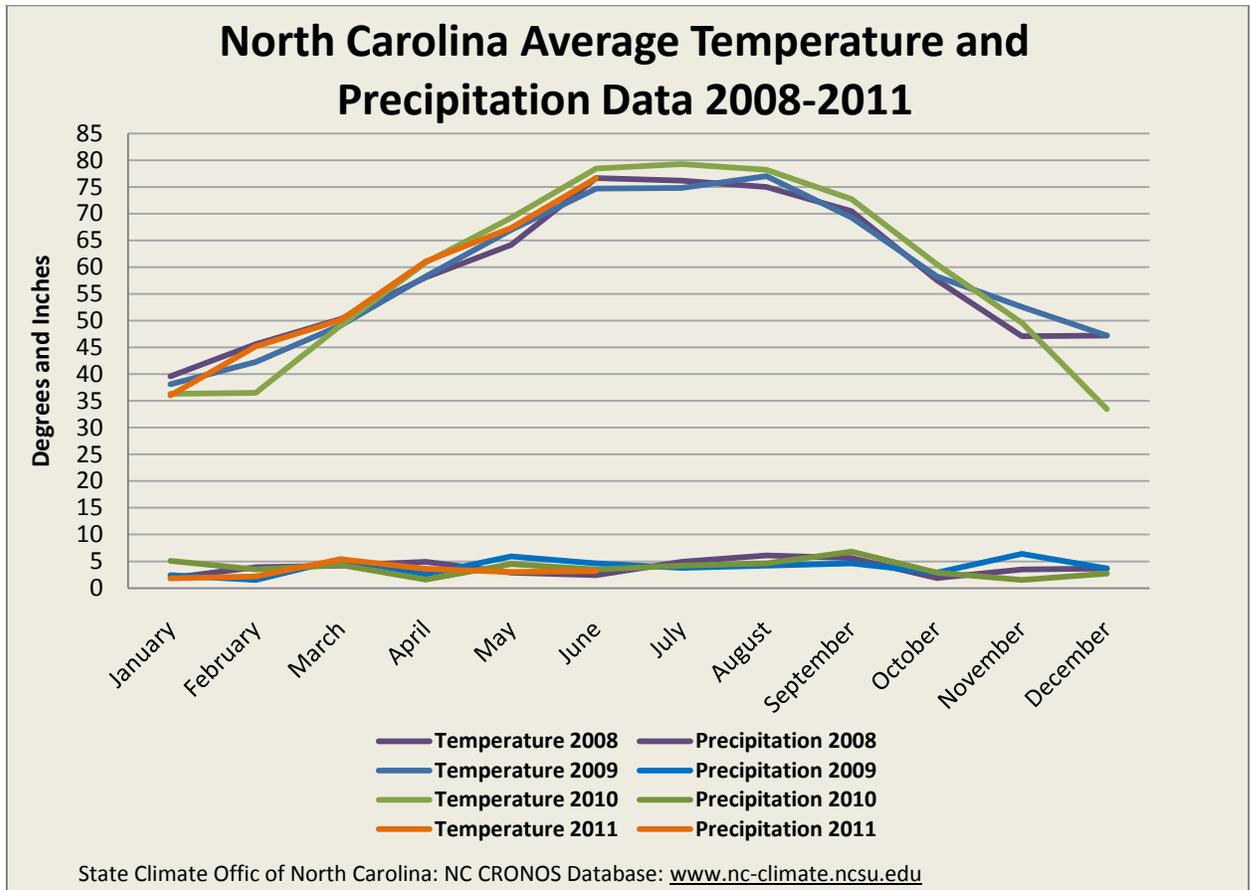

Chart 14 provides 13 months of air temperature and precipitation. This data, when analyzed together with gas price data and other tourism indicators, can be valuable in determining possible reasons for significant increases and/or decreases in indicators. For instance, greater than normal precipitation during a particular month can often help explain decreases in attendance at outdoor attractions.

The average temperature was down about two degrees in June 2011 from June 2010, though precipitation was about the same.

**Section 2 – Geographic Marketing Region (Coastal/Piedmont/Mountain) Tourism Indicator Analysis for June 2011**

**Chart 15 – Hotel/Motel Statistics by Geographic Region - June 2011**

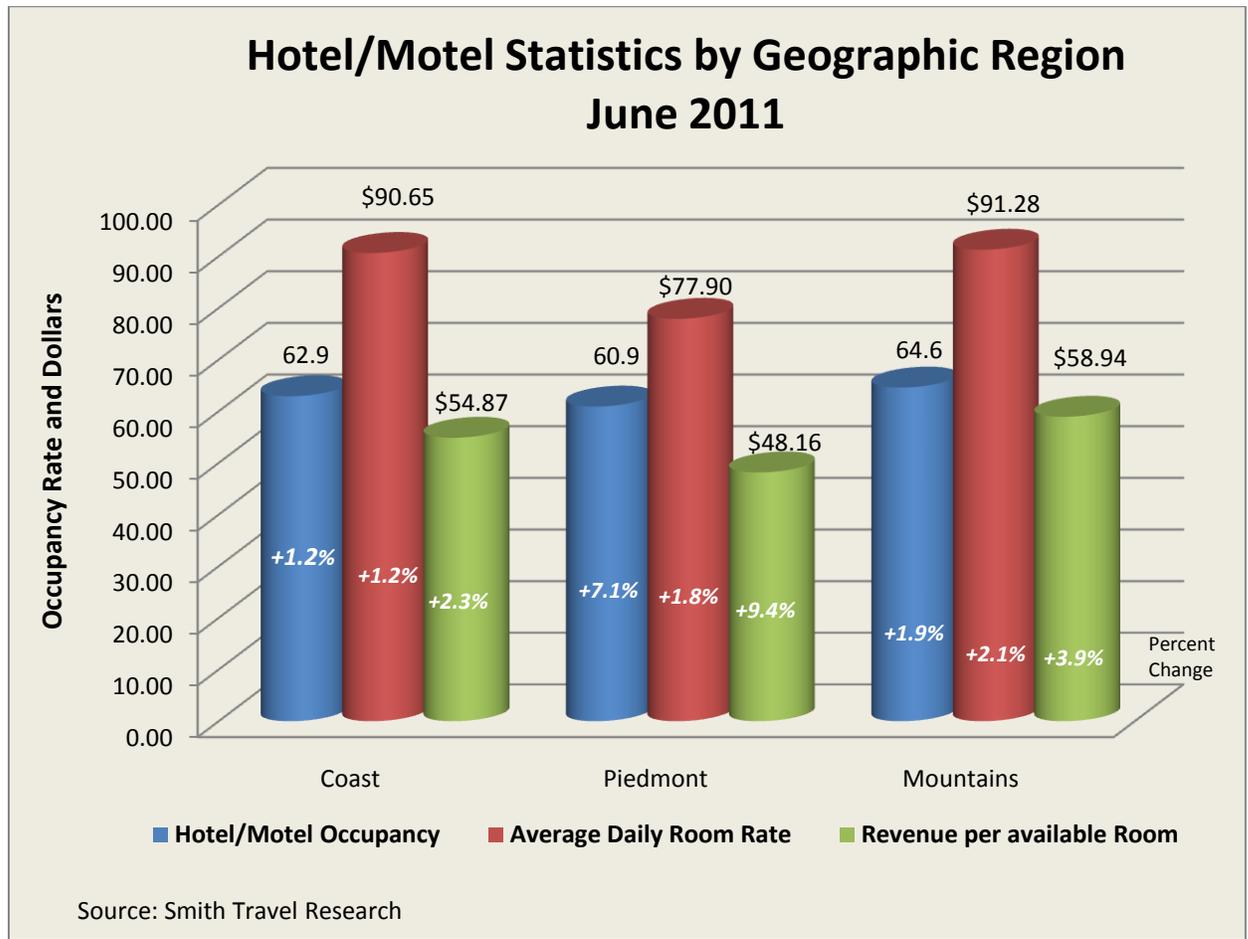

Chart 15 provides a one year comparison in lodging statistics for the three geographic marketing regions of North Carolina in June. Major indicators in all three geographic regions showed increases in June 2011 as compared to 2010.

Chart 16 – Hotel/Motel Room Demand by Geographic Region - June 2011

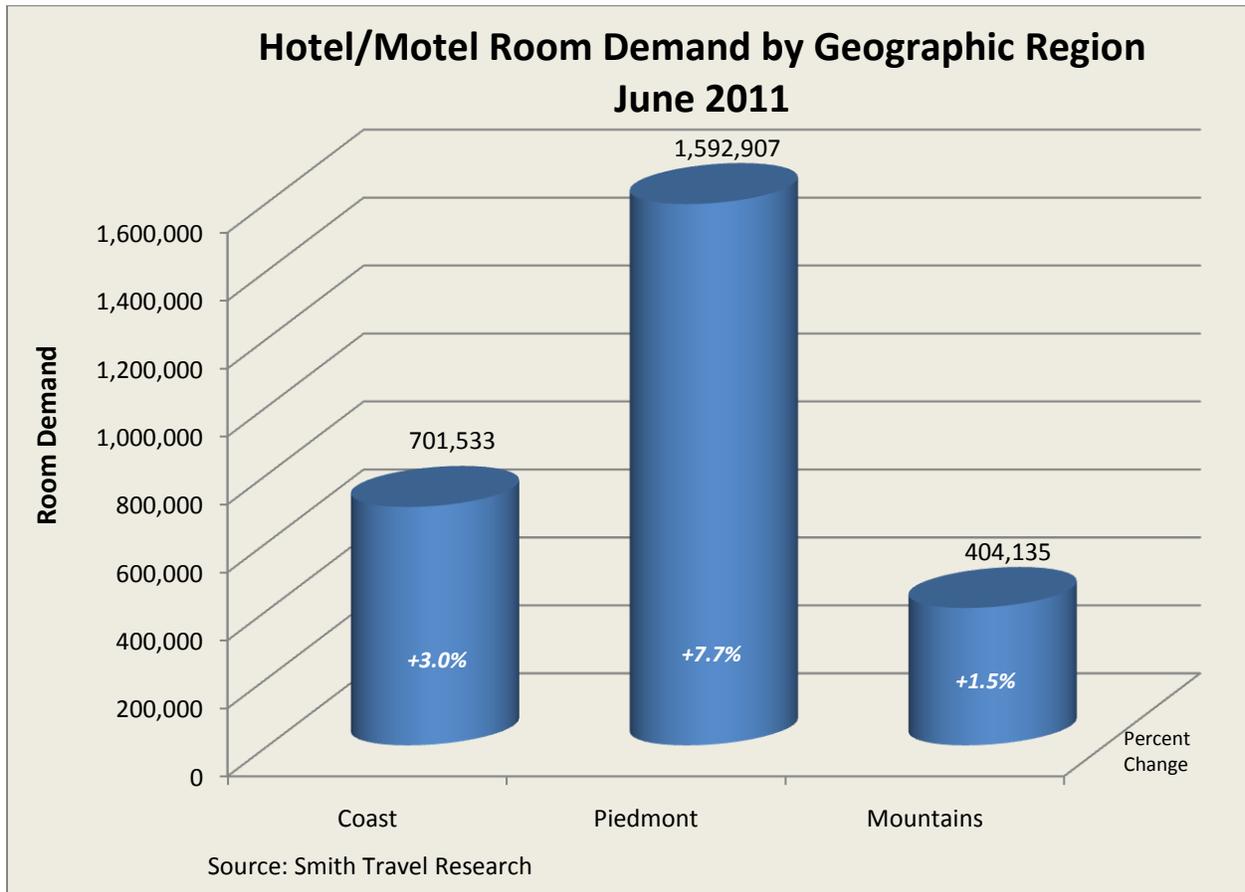

Chart 16 provides hotel/motel demand by geographic region for June 2011. Demand differs from occupancy in that it is the total number of rooms sold, not accounting for differences in room supply. The Piedmont Region had demand growth of nearly eight percent, and the Coastal Region had demand growth of three percent, from June 2010 to June 2011. The Mountain Region showed positive growth as well, after several months of declining demand.

Chart 17 – Visitation to Attractions and Parks by Geographic Region – June 2011

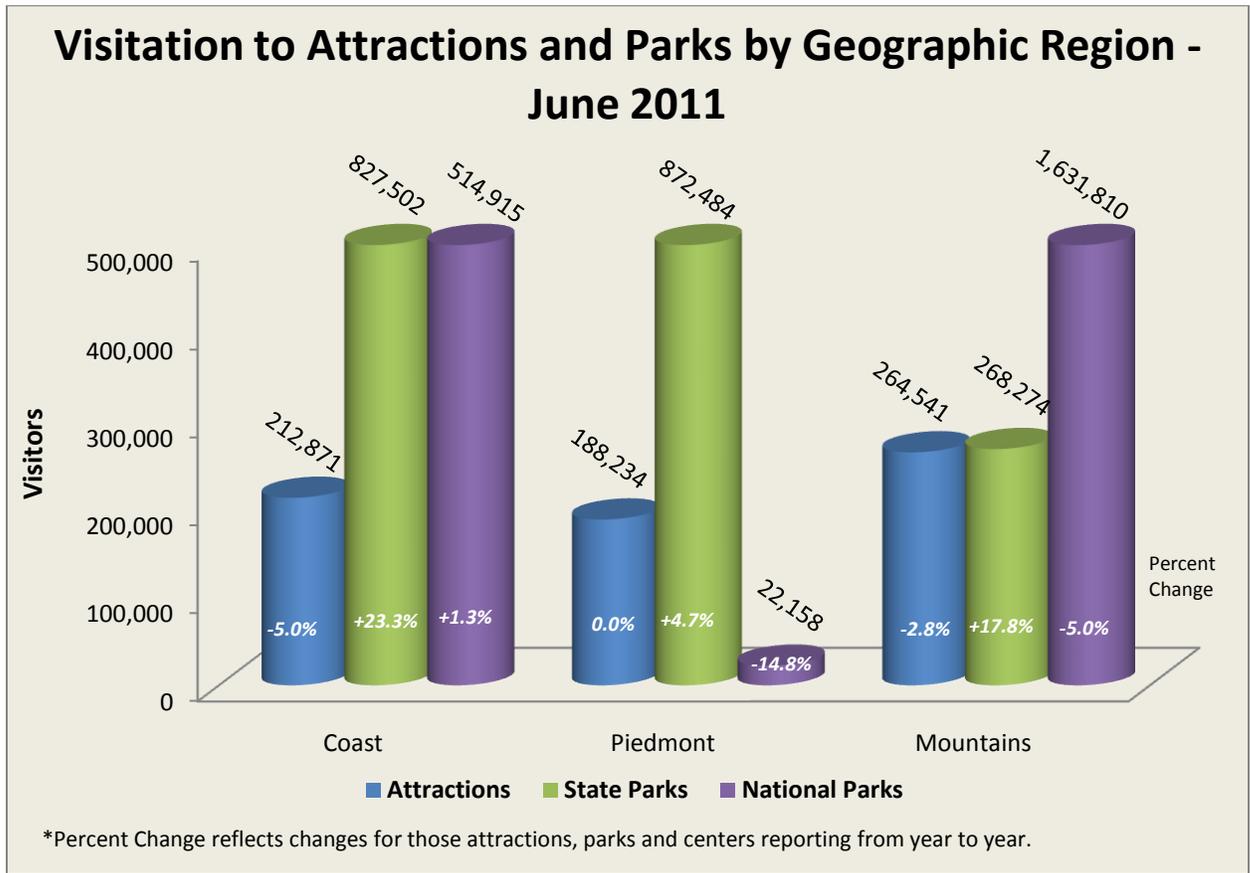

Chart 17 provides a look at the attractions industry in North Carolina in June 2011 by geographic region. As with the statewide numbers, the following data represents only a sample of North Carolina attractions that provide their attendance data, and are not intended to be considered a complete list of attractions. However, the wide variation of type and location of the participating attractions allow for a valid aggregate trend analysis on a monthly basis.

The Coastal Region saw increases in attendance at national and state parks, but decreased visitation at attractions. As well, state park attendance in the Piedmont and Mountain regions had positive growth from June 2010 to 2011.

Chart 18 – State Welcome Center and Local Visitor Center Attendance by Geographic Region – June 2011

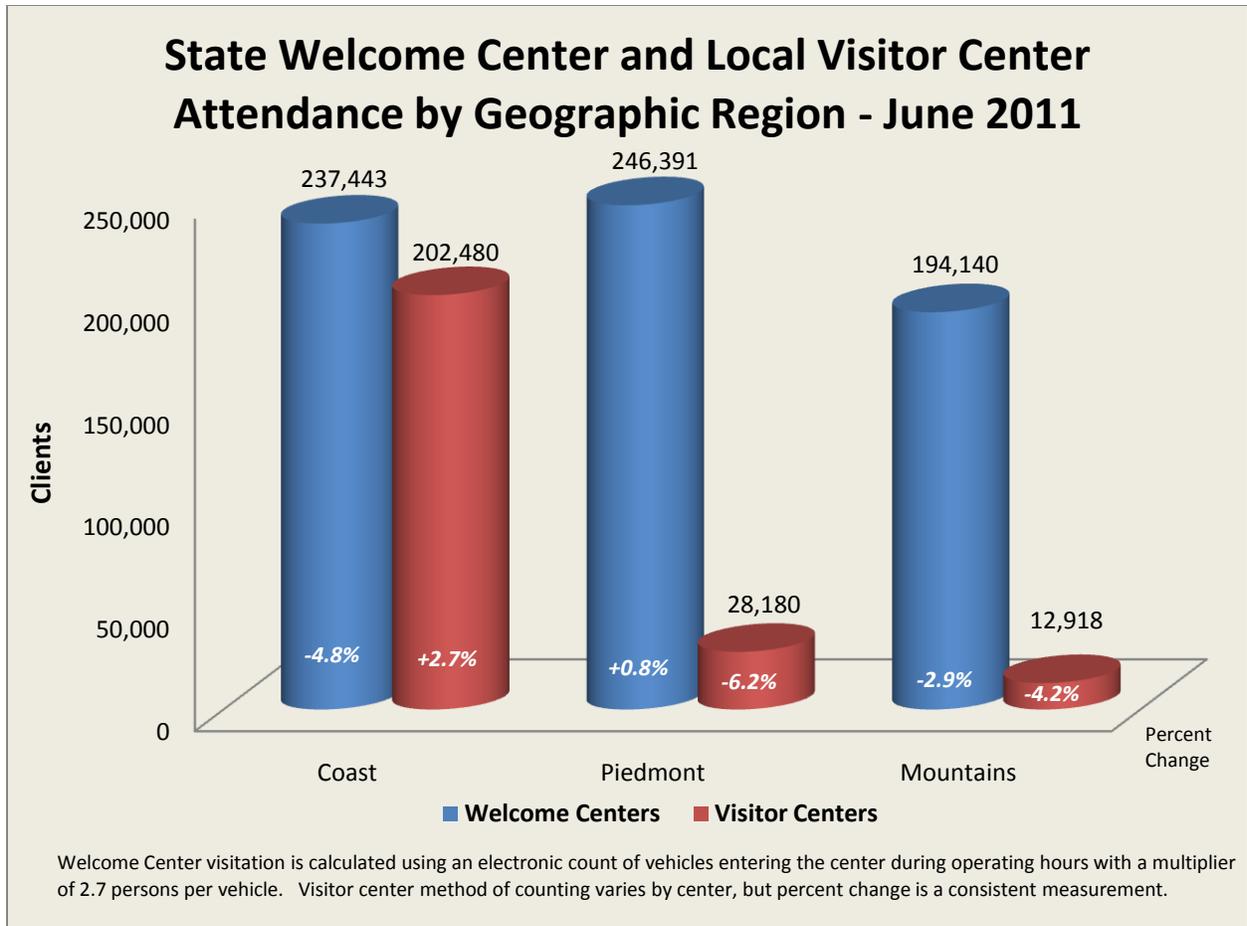

Chart 18 shows welcome center and visitor center attendance by geographic region and offers comparisons from June 2010. The Coastal Region visitor centers experienced decreases from June 2010, though the Piedmont and Mountain regions had declines. Welcome Center visitation was up slightly in the Piedmont Region, but down in the Coastal and Mountain Regions.

Chart 19 – Airport Arrivals and Departures by Geographic Region – June 2011

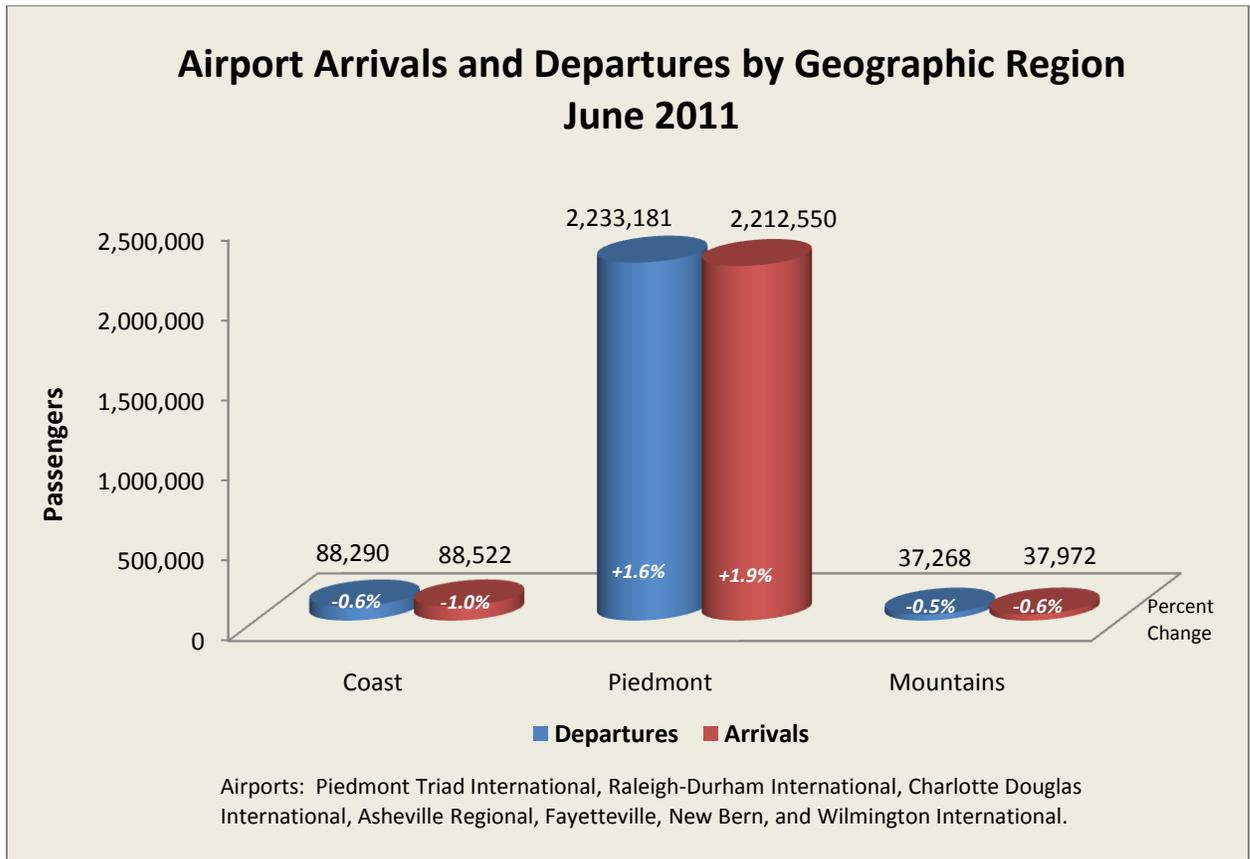

Chart 19 provides a breakdown of air travel statistics by geographic region. While the majority of air traffic is through the Piedmont Region, it is helpful to maintain a trend of other regional airport usage. The Mountain and Coastal regions showed slight declines in growth during the month of June as compared to June 2010, while the Piedmont regions experienced slight increases for the month.

### Section 3: Economic Development Region Tourism Indicator Analysis – June 2011

The seven economic regions include:

- 1 – Northeast (Bertie, Camden, Chowan, Currituck, Gates, Halifax, Hertford, Northampton, Pasquotank, Perquimans, Beaufort, Dare, Hyde, Martin, Tyrrell, Washington).
- 2 – Eastern (Carteret, Craven, Jones, Onslow, Pamlico, Duplin, Edgecombe, Green, Lenoir, Nash, Pitt, Wayne, Wilson).
- 3 – Southeast (Brunswick, Columbus, New Hanover, Pender, Bladen, Cumberland, Hoke, Richmond, Robeson, Sampson, Scotland).
- 4 – Triangle (Franklin, Harnett, Johnston, Vance, Wake, Warren, Chatham, Durham, Granville, Lee, Moore, Orange, Person).
- 5 – Triad (Alamance, Caswell, Guilford, Montgomery, Randolph, Rockingham, Davidson, Davie, Forsyth, Stokes, Surry, Yadkin).
- 6 – Carolinas (Alexander, Catawba, Cleveland, Iredell, Rowan, Anson, Cabarrus, Gaston, Lincoln, Mecklenburg, Stanly, Union).
- 7 – Western (Alleghany, Ashe, Avery, Buncombe, Burke, Caldwell, Clay, Graham, Haywood, Henderson, Jackson, Macon, Madison, McDowell, Mitchell, Polk, Rutherford, Swain, Transylvania, Watauga, Wilkes, Yancey).

Chart 20 – Hotel/Motel Statistics by Economic Development Region - June 2011

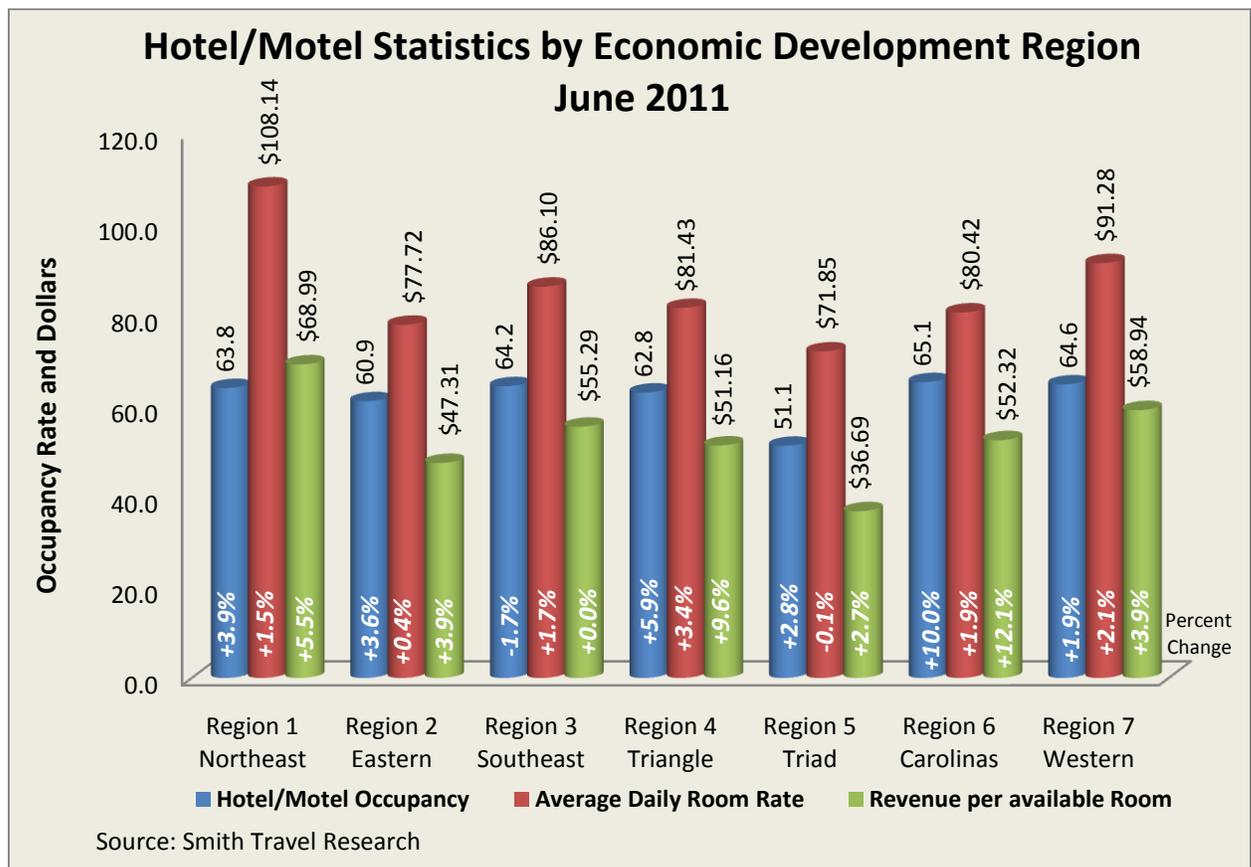

Chart 20 provides lodging indicators for June 2011 by economic development region. Also shown are percent changes from June 2010. This graph allows individual regions within the state to track indicators specific to their general destinations, while still being able to compare their data to the state data shown in Section 1.

Chart 21 – Hotel/Motel Room Demand by Economic Development Region - June 2011

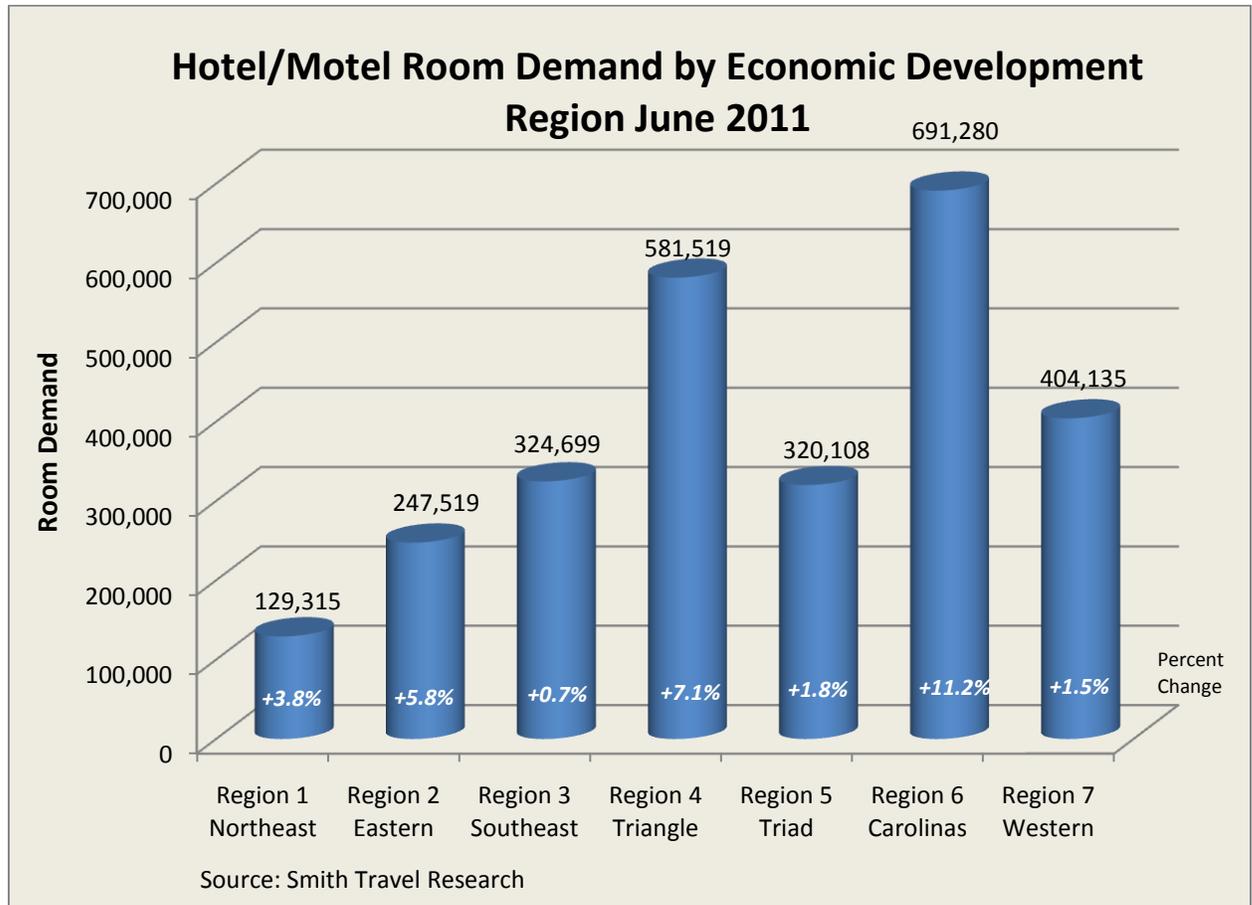

Chart 21 depicts hotel/motel demand for the month of June 2011 by economic development region. Demand is the number of rooms sold excluding complimentary rooms. All regions experienced increased demand from June 2010 to 2011. The Carolinas Region had a double-digit increase in demand from June 2010 to June 2011.

## Section 4: National Travel Price Index

The Travel Price Index (TPI) measures the seasonally unadjusted inflation rate of the cost of travel away from home in the United States. The TPI is based on U.S. Department of Labor price data collected for the monthly Consumer Price Index (CPI). The TPI is released monthly and is directly comparable to the CPI.

### Variables included in calculating the TPI:

Recreation Services	Food Away from Home	Airline Fares
Food and Beverage	Other Lodging (Include Hotel/Motel)	Intra-city Public Transportation
Alcohol Away From Home	Transportation	Motor Fuel
		Other Intercity Transportation

Chart 22 – National Travel Price Index December 2006 – June 2011

Chart 22 provides a five year trend of the National Travel Price Index (TPI). Steady growth was experienced through mid-2008; however in November 2008, it is clear that as the TPI fell below 2007 levels, the tourism industry began feeling the full effect of the recession. For most of 2009, the TPI remained slightly at or below the 2007 level. In December 2010, the TPI finally inched above the each of the previous Decembers from 2007, and continued that year-over-year growth into June 2011. However, the growth slowed in June to be just barely above the TPI of June 2010.
